

Mac  
SINCE 1984

**Why you will love a mac?**

It just works!

Design that turns heads~

Quartz Extreme Compositor Architecture

114,000 viruses?

Not on a mac

By the end of 2005, there were **114,000** known viruses for PCs.

In March 2006, there were **850** new threats detected against Windows.

**Zero** for Mac

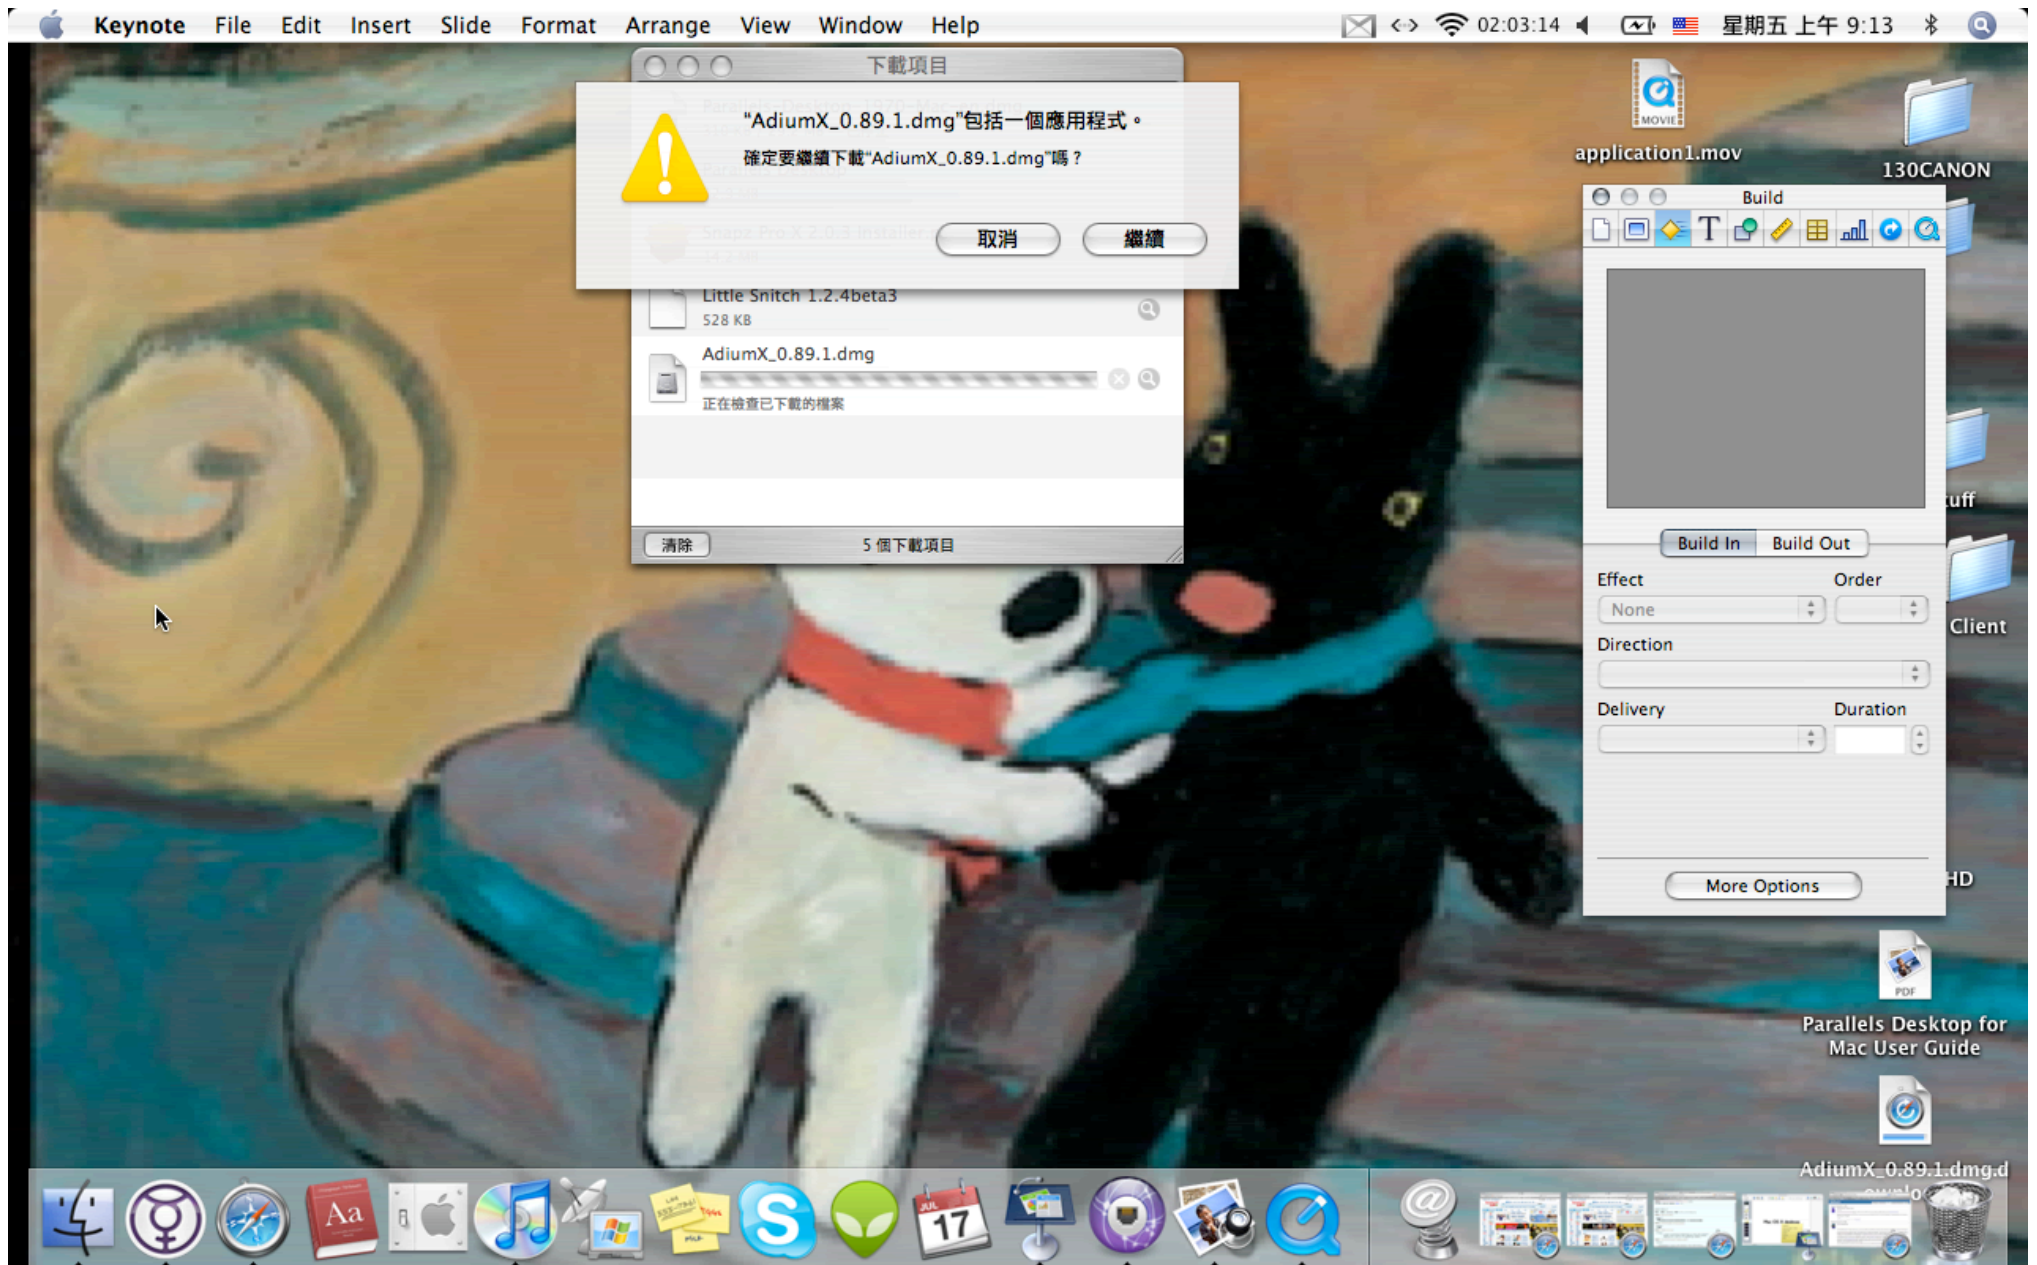

You can make **AMAZING** stuff !

**Mac OS X**

# Install an application

**.exe::PC = .dmg::MAC**

# Uninstall an application

what are the  
drawbacks?

# WHAT'S WRONG?

Visual.Net not available

IE supported web pages may not be fully available on Safari

incompatible MS Office files  
(differences of fonts & coding )

.exe files are not executable on UNIX-based Mac OS X

# connection to Windows

**RDC** (remote desktop connection)

**Boot Camp** (Windows on Mac)

**Parallels** (virtual machine)

# Mac v.s Windows

GET A MAC!!
